Office Action Summary

Application No.

09/611,562

Applicant(s)

KOBAYASHI ET AL.

Examiner

Tho v Duong

Art Unit

3743

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 05 March 2003 and 16 April 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 6-11 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 6-11 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. _____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☐ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)
Paper No(s)/Mail Date _____
- 4) ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date. _____
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☒ Other: Appendix A.

DETAILED ACTION

In view of the applicant's appeal brief filed 8/29/2003, the examiner has inadvertently exclude claim 11 from the rejected group of claims 7 and 9 in the Office Action sent 4/8/2003. Since claim 11 has never been rejected before, the prosecution now will be reopened to include the rejection of claim 11. The ground of rejection of claim 11 is similar to the ground of rejection of claims 7 and 9. Furthermore, if applicant would like to reinstate the appealing of the application, the applicant is request to send in a clean copy of the claims in the Appendix of the Appeal Brief.

The set of claims 6-11 as submitted in the preliminary amendment filed 3/5/2003 are rejected as following:

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 6 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The claimed subject matter of "N = the number of slit arrays/the number of fin units" renders the scope of the claim indefinite since it is not clear if N is the total number of slit array per a fin unit or per all the fin units of the heat transfer fin. Furthermore, applicant does not disclose that how many fin units are in the structure nor the number of slit arrays on any fin unit.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 6, 8 and 10 are rejected under 35 U.S.C. 102(b) as being anticipated by Kang et al. (US 5,755,281). Kang discloses (figure 10) a heat exchanger comprising a heat transfer coil (30) penetrating through a row of multiple plate-shape heat transfer fins (20); air (A) is supplied orthogonally to the heat transfer coil; the heat transfer fin is partitioned in at least one fin unit in which arrays of slits are arranged in a row. As regarding claim 1, the formula:

$W_s \geq (1 - 0.1(6-N))W_f/(2N+1)$, can be rearranged as

$W_s/W_f \geq (1 - 0.1(6-N))/(2N+1)$

Basing on the geometrical relationship of figure 10A, the ratio between the width of the slit to the width of the fin is $W_s/W_f=0.067$. Therefore, as long as N or number of slit array on the fin is greater than 9.8, the formula is satisfied. Kang discloses (figure 9) that the fin has more than 10 slit arrays. Therefore, the formula is satisfied. Also basing on the geometrical relationship of figure 10A, the ratio between the width of the slit and spacing between two slits to the diameter of the tube (30) are the same, which is approximately 0.22. This ratio is within the claimed range 0.17-0.29 and 0.18-0.5 of the invention. With regarding applicant's argument that it is improper to use proportion of the elements in the drawing, has been very carefully considered but is not deemed to be persuasive. It has been stated in rule 37 CFR 1.84. (k) (3) of the MPEP that "Elements of the same view must be in proportion to each other, unless a

Art Unit: 3743

difference in proportion is indispensable for the clarity of the view". Applicant is also advised to see case laws in re Mraz 173 USPQ and Vas-Cath Inc. V. Mahurkar 19 USPQ 2d for geometrical relationship. The examiner has taken the geometrical relationship of the diameter of the tube, W_s , W_f and spacing between two slits from the same view of figure 10A. Therefore, the measured ratio is considered to be readable on the claimed range. The geometrical relationship of Figure 10A is shown in the Appendix A, attached herewith.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 7, 9 and 11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kang in view of Park et al. (US 5,975,199). Kang discloses substantially all of the claimed invention as discussed above except for the limitation that the tube has a diameter of about 7 mm. Park discloses (figure 1, column 3, lines 1-2, and column 4, line 66- column 5, line 4) a heat exchanger that has a coil (2) with a diameter of 7mm been used in industrial application for the purpose of adapting the tube to be used in an air conditioner. It would have been obvious to one having ordinary skill in the art at the time the invention was made to use Parker's teaching in Kang's heat exchanger for the purpose of adapting the tube to be use in an air conditioner.

Art Unit: 3743

Conclusion

Any inquiry concerning this communication or earlier communication from the examiner should be directed to Tho Duong whose telephone number is (703) 305-0768. The examiner can normally be reached on from 9:30-6 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Henry Bennet, can be reached on (703) 308-0101. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.

Any inquiry of a general nature or relating to status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0861.
